

Standard Specifications for Concrete Structures -2001

“Maintenance”

PART 1: MAINTENANCE

CHAPTER 1 GENERAL	1
1.1 Scope.....	1
1.2 Definitions.....	4
CHAPTER 2 REQUIRED PERFORMANCE FOR CONCRETE STRUCTURES.....	8
2.1 Principle	8
2.2 General.....	8
CHAPTER 3 BASIC PRINCIPLES FOR MAINTENANCE	10
3.1 Principles.....	10
3.2 Maintenance procedure	12
3.3 Maintenance categories and descriptions.....	15
3.4 Inspection	16
3.5 Classification and identification of mechanisms of deterioration.....	19
3.6 Prediction of deterioration	19
3.7 Evaluation and judgment	20
3.8 Remedial measures	21
3.9 Records.....	22
CHAPTER 4 IDENTIFICATION OF DETERIORATING MECHANISM.....	23
4.1 Principles.....	23
4.2 Method of Identifying Deteriorating mechanism.....	25
CHAPTER 5 INITIAL INSPECTION.....	32
5.1 Principles.....	32
5.2 Methods of inspection.....	32
5.3 Estimation of deteriorating mechanism and prediction of deterioration.....	33
5.4 Evaluation and judgment	36
CHAPTER 6 ROUTINE INSPECTION	39
6.1 Principles.....	39
6.2 Inspection methods	39
6.3 Evaluation and judgment	40
CHAPTER 7 PERIODIC INSPECTION	43
7.1 Principles.....	43
7.2 Inspection methods	43
7.3 Evaluation and judgment	44
CHAPTER 8 DETAILED INSPECTION.....	46
8.1 Principles.....	46
8.2 Inspection methods	46
8.3 Prediction of deterioration	51
8.4 Evaluation and judgment	51

CHAPTER 9 EXTRAORDINARY INSPECTION	55
9.1 Principles.....	55
9.2 Inspection methods	56
9.3 Evaluation and judgment	56
9.4 Emergency inspection	58
CHAPTER 10 TECHNIQUES OF TESTING AND SURVEYING	59
10.1 Principles.....	59
10.2 Visual observation and hammer (tapping) test.....	59
10.3 Testing with non-destructive apparatus.....	59
10.3.1 general.....	59
10.3.2 Method with optical fiber scope	59
10.3.3 Method with rebound hammer	60
10.3.4 Electric and magnetic method.....	60
10.3.5 Methods using elastic waves propagating through concrete.....	60
10.3.6 Methods using electromagnetic waves	60
10.3.7 Electrochemical methods	61
10.4 Partial and small-scale destructive tests.....	61
10.5 Direct evaluation of the structural behaviors of existing structures.....	61
10.6 Evaluation of environmental action	62
10.6.1 general.....	62
10.6.2 Environmental actions related to carbonation induced deterioration	62
10.6.3 Environmental actions related to chloride induced deterioration	62
10.6.4 Environmental actions related to frost attack.....	62
10.6.5 Environmental actions related to chemical attack.....	62
10.6.6 Environmental actions related to alkali aggregate reaction (ASR).....	62
10.7 Performance test on repairing materials.....	63
CHAPTER 11 REMEDIAL MEASURES	64
11.1 Principles.....	64
11.2 Types of remedial measures	66
11.2.1 <u>Extensive</u> inspection	66
11.2.2 Repair.....	66
11.2.3 Strengthening	67
11.2.4 Appearance improvement	67
11.2.5 Serviceability restoration	67
11.2.6 Functionality improvement.....	67
11.2.7 Restriction in service.....	68
11.2.8 Demolition/removal	68
11.3 Repair.....	68
11.3.1 Principles.....	68
11.3.2 Repair plan	69
11.4 Strengthening	71
11.4.1 Principles.....	71
CHAPTER 12 RECORDS	75
12.1 Principle	75
12.2 Period of storing records	75
12.3 Method of preservation of records	75
12.4 Items to be recorded.....	76

PART 2: STANDARDS FOR MAINTENANCE

CHAPTER 13	STANDARD MAINTENANCE METHOD FOR CARBONATION INDUCED DETERIORATION	79
13.1	General	79
13.2	Method of deterioration prediction	80
13.2.1	General	80
13.2.2	Prediction of carbonation progress	80
13.2.3	Prediction of progress of corrosion of steel reinforcement	81
13.2.4	Correction of prediction	84
13.3	Methods of inspection	84
13.3.1	General	84
13.3.2	Initial inspection	85
13.3.3	Routine inspection	86
13.3.4	Periodic inspection	86
13.3.5	Detailed inspection	87
13.4	Evaluation and judgment	89
13.5	Remedial measures	91
13.5.1	Selection of remedial measures	91
13.5.2	Repair and strengthening	91
13.5	Records	92
CHAPTER 14	STANDARD MAINTENANCE METHOD FOR CHLORIDE INDUCED DETERIORATION	93
14.1	General	93
14.2	Method of deterioration prediction	93
14.2.1	General	93
14.2.2	Prediction of chloride ion diffusion	95
14.2.3	Prediction of progress of corrosion of steel reinforcement	96
14.2.4	Correction of prediction	98
14.3	Methods of inspection	99
14.3.1	General	99
14.3.2	Initial inspection	100
14.3.3	Routine inspection	100
14.3.4	Periodic inspection	101
14.3.5	Detailed inspection	102
14.4	Evaluation and judgment	103
14.5	Remedial measures	105
14.5.1	Selection of remedial measures	105
14.5.2	Repair and strengthening	106
14.5	Records	107
CHAPTER 15	STANDARD MAINTENANCE METHOD FOR FROST ATTACK	108
15.1	General	108
15.2	Method of deterioration prediction	108
15.2.1	General	108
15.2.2	Prediction of occurrence of frost damage	110
15.2.3	Prediction of frost deterioration depth	110
15.3	Methods of inspection	111
15.3.1	General	111
15.3.2	Initial inspection	112

15.3.3	Routine inspection	113
15.3.4	Periodic inspection.....	113
15.3.5	Detailed inspection.....	113
15.4	Evaluation and judgment	115
15.5	Remedial measures	117
15.5.1	Selection of remedial measures.....	117
15.5.2	Repair and strengthening	118
15.5	Records.....	119

CHAPTER 16 STANDARD MAINTENANCE METHOD FOR CHEMICAL ATTACK.. 120

16.1	General.....	120
16.2	Method of deterioration prediction	121
16.2.1	General.....	121
16.2.2	Prediction of progress of chemical attack.....	122
16.2.3	Prediction of progress of corrosion of steel reinforcement.....	124
16.2.4	Correction of prediction	125
16.3	Methods of inspection.....	125
16.3.1	General.....	125
16.3.2	Initial inspection.....	126
16.3.3	Routine inspection	127
16.3.4	Periodic inspection.....	127
16.3.5	Detailed inspection.....	128
16.4	Evaluation and judgment	132
16.5	Remedial measures	134
16.5.1	Selection of remedial measures.....	134
16.5.2	Repair and strengthening	135
16.5	Records.....	136

CHAPTER 17 STANDARD MAINTENANCE METHOD FOR ALKALI AGGREGATE REACTION..... 137

17.1	General.....	137
17.2	Method of deterioration prediction	138
17.2.1	General.....	138
17.2.2	Prediction of ASR progress.....	139
17.3	Methods of inspection.....	140
17.3.1	General.....	140
17.3.2	Initial inspection.....	141
17.3.3	Routine inspection	141
17.3.4	Periodic inspection.....	141
17.3.5	Detailed inspection.....	142
17.4	Evaluation and judgment	144
17.5	Remedial measures	145
17.5.1	Selection of remedial measures.....	145
17.5.2	Repair and strengthening	146
17.5	Records.....	147

CHAPTER 18 STANDARD MAINTENANCE METHOD FOR FARIGUE OF RC SLAB OF ROAD BRIDGE..... 148

18.1	General.....	148
18.2	Method of deterioration prediction	149
18.2.1	General.....	149
18.2.2	Correction of prediction	150

18.3	Methods of inspection.....	151
18.3.1	General.....	151
18.3.2	Initial inspection.....	152
18.3.3	Routine inspection	152
18.3.4	Periodic inspection.....	152
18.3.5	Detailed inspection.....	153
18.4	Evaluation and judgment	153
18.5	Remedial measures	155
18.5.1	Selection of remedial measures.....	155
18.5.2	Repair and strengthening	155
18.5	Records.....	156

CHAPTER 19 STANDARD MAINTENANCE METHOD FOR FATIGUE OF RC BEAM OF RAILWAY BRIDGE..... 157

19.1	General.....	157
19.2	Method of deterioration prediction	158
19.2.1	General.....	158
19.2.2	Prediction of fatigue progress	159
19.2.3	Correction of prediction	161
19.3	Methods of inspection.....	162
19.3.1	General.....	162
19.3.2	Initial inspection.....	163
19.3.3	Routine inspection	164
19.3.4	Periodic inspection.....	165
19.3.5	Detailed inspection.....	165
19.4	Evaluation and judgment	167
19.5	Remedial measures	169
19.5.1	Selection of remedial measures.....	169
19.5.2	Repair and strengthening	169
19.5	Records.....	170
