

KSCE-JSCE Concrete Committees Joint Seminar

The Korean Society of Civil Engineers (KSCE)–Japan Society of Civil Engineers (JSCE) Concrete Committees Joint Seminar was held on October 21, 2005, on Jeju Island, Korea, in conjunction with the 2005 KSCE Annual Conference. Following opening addresses by Professor Keun-Joo Byun, President of KSCE, and Dr. Hiroshi Mitani, President of JSCE, four speakers from Korea and four from Japan made presentations. At the end of the session, a small ceremony was held to present to each speaker a plate commemorating the joint seminar. The JSCE and KSCE Concrete Committees will continue to promote cooperation and scientific and technical exchanges such as this joint seminar.

Speakers and staff of KSCE-JSCE Concrete Committees Joint Seminar

Program of the KSCE-JSCE Concrete Committees Joint Seminar

Opening addresses

Keun-Joo Byun, President of KSCE
Hiroshi Mitani, President of JSCE

Presentations

Takumi Shimomura, Nagaoka University of Technology, Japan
“Activities of JSCE Concrete Committee”
Jong-Sung Sim, Hanyang University, Korea
“Activities of KSCE Concrete Committee”
Ryoichi Sato, Hiroshima University, Japan
“Mechanical performance of reinforced expansive-high strength concrete beams”
Hyuk-Chun Noh, KAIST, Korea
“Evaluation of effect of uncertain material properties on the structural behavior”
Toyaharu Nawa, Hokkaido University, Japan
“Autogenous shrinkage of high performance concrete”
Cheolwoo Park, Hanyang University, Korea
“Fracture analysis of bonded cement-based materials”
Tetsuya Ishida, University of Tokyo, Japan
“Multi-scale modeling of concrete performance at an early age”
Suckhong Lee, Hyundai Institute of Construction Technology, Korea
“Application of ubiquitous network for long-term monitoring technique of concrete properties”

Closing ceremony
