

14th Environmental Study Tour in Bali

Presented by Environmental Engineering Committee, JSCE

Overview: This tour is targeting for undergraduate students, graduate students including international exchange students. The objective of the tour is to understand the environmental problems in developing countries and exchanging opinions with researchers, government officer, and participants. We visit Bali Island, whose lifestyle and environment is changing by development. We will watch the environmental problems such as inadequate solid waste disposal and polluted river. Simultaneously, we will visit the classical Balinese village. We can consider what has changed in or affected on Bali by the recent development. We will also watch the environmental restoration programs such as mangrove restoration and coral restoration. **Let us join it and make a lot of international friends!**
