

## **The international work shop on volcanic engineering**

Organizer: Volcanic engineering research board, Japan Society of Civil Engineering

Chairman: Dr. Kazuo Takahashi, Nagasaki University

The purpose of the work shop is introducing erosion and sediment related events around active volcanoes and discussing control practices and mitigation measure particularly against lahars and volcanic mud flows. The board also will be inviting an Indonesian engineer and a researcher from New Zealand tentatively. Some Japanese researchers and engineers will join the meeting to discuss common threads.

Time and date; 13:30 – 16:30, November 28, Wednesday, 2007

Venue; Earthquake Research Institute, Tokyo University

Convention room 1, the second building

1-1-1, Yayoi, Bunkyo, Tokyo 113-0032, Japan

Topics; Sediment related events and their engineering measures

Plenary talk; Dr. Thomas C. Pierson (USGS, Cascade Volcano Observatory)

Speakers; Mr. Hariyono Utomo (Sabo Technical Center, Indonesia)

Mr. Haruo Nishimoto (Sabo Division, MLIT, Japan)

Dr. Takao Yamakoshi (Public Works Research Institute, Japan)

Dr. Nobuo Anyoji (Sabo Technical Center, Japan)

Anonymous (New Zealand) suspense

Discussion; all speakers and Dr. Ryouzuke Kitamura, Kagoshima University, as a convener
