The screenshot shows a Microsoft Internet Explorer browser window displaying the Japanese Meteorological Agency website. The page title is '気象庁 | 気象資料の閲覧・入手方法 - Microsoft Internet Explorer'. The address bar shows the URL 'http://www.kishou.go.jp/177jmh/index.html'. The page content includes the following sections:

- 気象庁** (Japan Meteorological Agency) logo and navigation links (Home, Disaster Meteorological Information, Meteorological Statistics, Meteorological Knowledge, About the Agency, and Internal/Inquiry/Links).
- 気象資料の閲覧・入手方法** (Access and Acquisition of Meteorological Data):
 - Introduction: Data provided by the Agency can be viewed on this page or accessed online through the Meteorological Business Support Center.
 - 気象業務支援センター** (Meteorological Business Support Center): Provides real-time information (weather forecasts, weather maps, advisories, earthquake information) for a fee via online or fax.
 - 気象庁情報カタログ** (Meteorological Information Catalog): A catalog of various meteorological information provided by the Agency.
 - 民間の気象情報サービス** (Private Meteorological Information Services): Services provided by private companies using data from the Meteorological Business Support Center.
 - 気象無線機写通報 (JMH)** (Weather Radio Teletype Service): A dedicated radio teletype service for ships and other users with appropriate equipment.
 - 気象庁気象衛星無線通報** (Weather Satellite Radio Teletype Service): A system for receiving satellite-based meteorological data via radio teletype.
