

Special Session

Asset Management for Infrastructure	Kazumasa Ozawa	1-4
Asset Management for Road Infrastructure Tokyo Metropolitan Government Asset Management and the Employment Effect	TSentaro Takagi	5-8
An Attempt to Maintain the Harbor Facilities Based on Life Cycle Management Technique	Shogo Miyajima, Yasunobu Asami, Shinji Toho and Takashi Sawada	9-14
Superannuation and Destruction of Shore Protection Facilities	Fuminori Kato and Kenji Noguchi	15-20
A Current State and Engineering Subjects on Investigation, Measurement, Diagnosis and Deterioration Forecast of Port & Harbor Structure	Tomoo Iba, Hiroshi Shimada, Kazushi Kurokawa, Nobukazu Sasaki, Yuji Sugiyama and Fumikazu	21-26
A Summary of the Special Session 'Environment Restoration Project - Implementation of the Adaptive Management-'	Keita Furukawa, Haruyuki Kojima and Fuminori Kato	27-32
Objectives for Adaptive Management of Tidal Flat Restoration Project -Case Study at Tokuyama-Kudamatsu Port	Tadashi Asai, Yoshihiro Nishida and Masahiro Shimazaki	33-38
Implementation and Evaluation of Adaptive Management in Environmental Restoration Projects in US.	Masakazu Yoshimi, Yasushi Hosokawa, Iwao Oshima, Osamu Matsuda, Takashi Satou and Hideo Suzuki	39-44
Public-Private Partnership and Technological Development to "The Action Plan for Osaka Bay Restoration"	Kaoru Iguci, Hiroto Asakura, Michio Higashijima and Fujio	45-50
Adaptive Management for Sustainable Settlement of Short-necked Clam on a Tidal Flat Constructed in Port of Amagasaki	Harumitsu Murakami, Yoshiyuki Nakamura and Shinya Hosokawa	51-56
Development of Benthic Communities on Constructed Tidal Flat at Han-nan 2nd. Section -Relations of Benthic Recruitment to Dredged Materials with Benthic Communities of a Peripheral Sea Area-	Kana Takeyama and Hiroyuki Iwamoto	57-62
The Effect of Spread Enlightenment Activities on Nature Restoration Project Aimed at Coral	Susumu Nakano, Hiroshi Aki, Hiro'omi Uchida, Fumihito Iwase, Hajime Kawaguchi and Hitomi	63-68

Coastal Disaster Prevention -Rehabilitation and Disaster Preventing City Against Tsunamis-	Fumihiko Imamura, Takashi Tomita, Norimi Mizutani, Yoichi Moriya, Katsutoshi Kimura and Natsuhiko Ohtsuka	69-72
--	---	-------

Simple Measurement Method for Wave Information Using GPS Buoy and It's Experimental Results	Daijin Hou, Yun-, Sa Yoo and Nobuyoshi Kouguchi	73-77
Ocean Experiment on a Low-cost GPS-based Wave Height and Direction Sensor	Takahiko Murayama, Hiroto Nakanishi, Yoshihiro Utsunomiya, Masatoshi Matsuda and	79-84
Development of Real-time Wave Information and Analysis Database	Kuniaki Matsuura, Shiro Suzuki, Noriaki Hashimoto and Masashi Motohashi	85-90
Sea Surface Water Environmental Measurement Using Video Image	Kojiro Suzuki and Akira Takeda	91-96
A Study on Accuracy of the On-air Acoustic Tide Gauge at Sea Areas with Large Tide Amplitudes	Kenji Sasa, Toshihiko Nagai, Kazuo Kuwagaki and Shinichi Hattori	97-102
Validation of Atmosphere-Ocean-Wave Coupled Mode for Ise Bay Affected by Meteorological Disturbances	Tomokazu Murakami, Koji Kawasaki, Masato Yamaguchi and Norimi Mizutani	103-108
Verification of GFS-WRF-SWAN Wave Prediction System by Three Seasons' Comparison	Hajime Mase, Shingo Katsui, Tomohiro Yasuda, Tracey H. Tom and Kazuhiro Ogawa	109-114
On the Applicability of Multi-level Wave Model for Wave Deformation Analysis on Steep Bathymetry	Susumu Kanayama	115-120
Analysis of Wave Characteristics in the Seto Inland Sea by Using Wave Hindcasting Data Base	Noriaki Hashimoto, Michiyoshi Kodama, Masato Mitani, Nobuaki Tomoda, Hideo Matsumoto and Eriko Matsufuji	121-126
Examination of Spectral Effects on the Distribution of Individual Wave Heights	Yoshimi Goda and Masanobu	127-132
Characteristics of Unusual Tides along the Southern Kyushu and Nansei Islands Regions	Toshiyuki Asano, Toru Yamashiro, Kazuhisa Ousato and Kiyomasa Kitajima	133-138
Numerical Study of Storm Surge and Ocean Waves in U.S.A. Caused by Hurricane Katrina	Shigeki Inagaki, Fuminori Kato and Masaya Fukuhama	139-144
The Characteristics of Long-period Wave Absorption Facility Applying Eddy Loss Effect	Kaori Ohshima, Yoichi Moriya, Masahito Tsuru, Shigeki Sugita and Tetsuya Hiraish	145-150
Analysis of the Relationship between Bound Waves and Total Infragravity Waves Using Observed Wave Data	Keiji Nakai	151-156
A Countermeasure Against Low Frequency Motions of a Moored Ship Using Shielding Structure	Shinkichi Tanigaki, Masami Matsuura and Kazuyoshi Kihara	157-162

Questionnaire Research on the Opinion of Inhabitant about Public Work in Coastal Zone	Hiroaki Shimada, Taisuke Ishigaki, Yoshiaki Kinoshita and Ryosuke Okamoto	163–168
Study of Coastal Utilization for Surfing and Environmental Assessment of the Sendai City Suburban Coast	Yukio Chiba, Toshihiko Takahashi and Shinichi Arai	169–174
Study on Green Purchasing for Port and Airport Construction	Ryo-ji Naito, Kyouichi Shouji and Takemi Hatakeda	175–180
New Trends in Coastal and Marine Management in China	Guofang Zhai and Takeshi Suzuki	181–186
Present State of Japanese Coast According to Public Relations Pamphlets Issued by Local and Central Government Agencies	Nao Yamamoto, Yasuro Ohtani, Susumu Kubota and Shintaro Hotta	187–192
Increase in Disaster Potential Associated with Change in Coastal Land Use – Example on Kamogawa Beach in Chiba Prefecture–	Takaaki Uda, Yuki Yoshi Hoshigami, Satoquo Seino and Hiroki Ozawa	193–198
Evaluation of Life-cycle Scenario of Deteriorated Open-type Wharf Considering Decrement in Load Carrying Capacity	Hiroshi Yamauchi, Hiroshi Yokota, Ema Kato and Mitsuyasu Iwanami	199–204
The Residents' Consciousness about Disaster Prevention and Reduction, and Propose to Hazard Map	Kentaro Morimoto, Kiyoshi Takikawa	205–210
Macro-benthic Fauna as Restoration Objectives and its Constraints in Keihin Canal, Japan	Chizuru Satoh, Keita Furukawa and Tomonari Okada	211–216
Habitat Conditions to Restore a Tidal Flat for Culturing Short-necked Clams and Their Application to Adaptive Management in Case Study at Tokuyama–Kudamatsu Port	Tadashi Asai, Yoshihiko Yonehara, Shigeki Yoshikawa, Masashi Aihara, Iwao Oshima and Mitsumasa Okada	217–222
Study on the Mechanism of Environment Change at the Artificial Tidal Flat, "Yacho-No-Ike", in Ariake Sea	Yosuke Misako, Kentaro Morimoto, Kiyoshi Takikawa, Tatsuya Masuda, Akiko Kouda and Eriko Yamashita	223–228
An Attempt of Integrated Environmental Assessment Based on Multiple Habitat Suitability Analysis	Keita Furukawa and Stephanie Wallace	229–234
Understanding of Integrated Social Concern to Develop Tidal Flats and Shallows in Mikawa Bay	Takeshi Suzuki and Yoshio Tanabe	235–240
Improvement of Porous Layer Boundary on Boussinesq-type Wave Transformation Model	Katsuya Hirayama	241–246
Verification of Wave-induced Current on a Reef Simulated with Boussinesq-type Wave Transformation Model	Katsuya Hirayama, Junzo Hasegawa and Yasuhiko Minami	247–252
Velocity Distributions in Breaking Waves Using a Gas-liquid Flow	Hirokazu Sumi, Tsuyoshi Kanefuji and Tatsuya Uematsu	253–258
A Time Domain Analysis of Multidirectional Random Wave Transformation with Linearly Distributed Incident Wave Spectrum	Kazuya Oki and Tetsuo Sakai	259–264
A Countermeasure Against Wave-overtopping Using Scrap Concrete of Damaged Seawalls	Ryuichi Fujiwara, Toru Sawaragi, Michio Miyake and Akiko	265–270
Experimental Study on Countermeasures Against Water Spray Caused at a Vertical Breakwater	Masaru Yamashiro, Akinori Yoshida, Yasuhiro Nishii, Hiroki Hashimoto, Takeshi Kashima and Aroh Ishidoh	271–276
A Study on Damaged Seaside Houses Due to Wave Overtopping	Yohei Sakai, Yasuji Yamamoto, Katsutoshi Kimura, Satoru Furukawa and Takao Nakoshi	277–282
Study on Basic Properties of Non Wave-overtopping Type Seawall in Deepwater	Hiroki Hashimoto, Masaru Yamashiro, Akinori Yoshida, Yoshihiro Uetani, Yoichi Moriya and	283–288
A Calculation Method of Wave Overtopping Rate on Permeable Terrace-type Seawall	Katsutoshi Tanimoto, Masato Saito and Hideya Shida	289–294
Characteristics of Wave Overtopping Generated Above Flaring Shaped Seawall in Beppu Bay	Yuji Kamikubo, Keisuke Murakami, Takefumi Usui, Ienori Tominaga, Yasuto Kataoka and Naoto	295–300
Hydraulic Characters of the Flaring Shaped Seawall with Slit Type Wave Absorbing Works	Keisuke Murakami, Kenta Shimizu, Hisaki Ogawa, Akihisa Sakamoto, Yuji Kamikubo and Yasuto Kataoka	301–306
Experimental Research on the Characteristics of Wave Forces and Wave Overtopping for Seawalls in Rough Sea Areas	Kenichiro Shimosako and Nanako Osaki	307–312
Wave Force Acting on the Axisymmetric Caisson with Slanting Upper Wall	Tsuyoshi Ikeya, Takako Fukuyama and Satoshi Inagaki	313–318
Verification of Wave Pressure Acting on a Breakwater with Footing	Keiji Esaki, Tomotsuka Takayama and Tomohiro Yasuda	319–324
Recognition of the Multiple Functions of the Fishery Industry and Fishing Villages in Fishing Areas	Atsumi Furuya, Takanori Asakawa, Shuhei Takahashi, Toru Koganeyama, Masamitsu Nakaizumi and Akira Nagano	325–330
Research on Fishery Task Analyses by Compiling Input-output Tables of Fishing Villages and Comparing Industrial Structures	Atsumi Furuya, Hiroyuki Kamikawa, Shigeshi Kitahara, Noritaka Asakawa, Masamitsu Nakaizumi and Akira Nagano	331–336
Research to Evaluate the Total CO2 Emissions in Fisheries and Fishing Villages	Atsumi Furuya, Noritaka Asakawa, Nobukazu Shinohara, Masaki Fukamura, Masamitsu Nakaizumi and Akira Nagano	337–342

Wind Reducing Effect of Windbreak Using Thinned Woods for Safe Mooring of Fishing Boats	Akito Satou, Hiroaki Gahara, Seikou Kawaji, Kazuhisa Ogawa, Toshihide Tachisako and Tokunori Higashi	343-348
Study on Evaluation of Physical Load in Working Environment at Sea	Yoshiyuki Katayama, Masaharu Kimoto, Michio Gomyo and Takeo Kondo	349-354
Comparative Study of Fishing Port Improvement that Utilized Traceability System -Fukushima Fishing Port as Example-	Katsunori Seino, Shigeshi Kitahara, Hiroyuki Kamikawa, Yoshikazu Doi and Akira Nagano	355-360
Study on Improvement of Quality and Hygiene Management in Rausu Fishing Port by Introducing Traceability System for Marine Products Transport in Constant Temperature	Takashi Wakabayashi, Norihiko Izumida, Kinya Yamoto, Koichi Kamikawa, Masamitsu Nakaizumi and Akira Nagano	361-366
New Hastening Method of Water Exchange between Fishing Port and Ocean by Using Cold Water Discharge	Masabumi Seto, Toyoko Takeuchi, Takahiro Kazama and Shinya Otake	367-372
Experimental Study for Improving the Environment of Fishing Ground by Tilling in Enclosed Water -An Example in the Fishing Ground of the Freshwater Clam in Lake Shinji-	Yoshinaga Setoguchi, Naotaka Yoshimura, Koutarou Gotou, Takashi Nakanishi and Takatoshi	373-378
Study on Dredged Material Dumping into the Ocean from Fishery Ports and Simulation on Diffusion	Noritaka Asakawa, Kaoru Honma, Akito Satou, Hiroaki Gahara and Takayuki Tashiro	379-384
Study on Weight Content of Scallop Shell and Movement Limit Wave Height of Basic Study on Practical Use to Back-fill Material of Fishery By-product (No.3) -Internal Friction Angle of Sand Mixed with Scallop Shell-	Shoeki Kawamura and Masato	385-390
Characteristics of Benthic Community on Artificial Reefs of Scallop Shell	Yukio Tsubota and Kimiyasu Saeki	391-396
Investigation of Origin of Littoral Drift Forming Kujukuri Coastal Plane	Akemi Sato, Kumiko Adachi and Yoshimi Makita	397-402
Long-term Shoreline Changes of Yoshizaki Coast in Mie Prefecture	Yukiyoshi Hoshigami, Takaaki Uda, Yasuhito Noshi and Hiroki Ozawa	403-408
Guideline of Comprehensive Sediment Management in Tottori Prefecture	Takaaki Uda Shin-ichiro Shindo, Toshiyuki Kobayashi, Takashi Goto, Toshiyuki Kuroki and Masaru	409-414
Beach Changes around Mouth of Hino River Flowing into Lake Biwa and Their Causes	Yoshiyuki Yasumoto, Takaaki Uda, Yuhei Matsubara and Shinji Sato	415-420
Sediment Transport Due to Floods around the Abe River Mouth	Koichi Harima, Shigenori Sugimura, Takaaki Uda and Takahiro Nakatsuji	421-426
Lakeshore Erosion Due to Waves Transmitted through Entrance Channel of Lake and Formation of Sand Spit	Hideki Meguro, Takehiro Oki, Koichi Yamamoto, Koji Yamamoto and Tadashi Suetsugi	427-432
Simulation of Sorting in the Crossshore Direction and Topography Change of the Beach Composed of Mixed Bed Materials by SBEACH Type Model	Takaaki Uda, Kazuya Sakai, Masumi Serizawa, Masahiro Miura and Yukiyoshi Hoshigami	433-438
Prediction of Beach Changes around Gently Sloping Revetment	Tsuyoshi Arimitsu, Daisuke Kawano and Ichiro Deguchi	439-444
Evaluating of Long-term Shoreline Change by Using Old Maps	Masaya Fukuhara, Takaaki Uda, Masumi Serizawa and Kou Furuike	445-450
Coastal Sediment Balance Under Condition of Existence of Large-scale Sand Dunes in Northeastern Brazil	Genki Takahashi, Hitoshi Tanaka, Hideo Matsutomi and Norihiro Izumi	451-456
A Process Study of Suspended Sediment Material Transport in the Ishikari Bay	Susumu Onaka, Takaaki Uda, Toshiro San-nami and Koji Kobune	457-462
Evaluations of Sediment Mobility by Grouped Waves and Associated Long Waves in Integrated Surf and Swash Zones	Viet Son Le, Toshihiko Yamashita, Makoto Miyatake, Takeshi Okunishi and Ryuichiro Shinohara	463-468
Wind-tunnel Study for Suspended Wind-blown Sand Crossing Over Wind-breaks	Mahmood R.Akbarpour Jannat and Toshiyuki Asano	469-474
Temporal and Spatial Distributions of Suspended Sediment Concentration in Different Equilibrium Beach Profiles	Masashi Ugai, Koichi Hosaka, Susumu Kubota and Shintaro Hotta	475-480
Study on the Effect of the Site Amplification Factor in the Evaluation of Level-one Earthquake Ground Motion	Hirokazu Sumi, Tsuyoshi Kanefuji and Tatsuya Uematsu	481-486
A Study on the Allowable Displacement for Gravity Type and Sheet Pile Type Quay Walls Against the Level-one Earthquake Ground Motion	Takashi Nagao, Noriaki Morishita and Atsushi Nozu	487-492
Study on the Damage Characteristics of Hakata Port Facilities by the Fukuoka Western Offshore Earthquake	Takashi Nagao, Masaki Fujimura, Hidemasa Sato and Noriaki	493-498
Study on the Evaluation of the Seismic Intensity at Takamatsu Port by the Past Destructive Earthquake	Ichio Motono, Shigeru Imanaga, Kouichi Fujita and Yoshimi Shimano	499-504
Development of a Simple Seismic Performance Evaluation Technique for Coastal Structures	Takashi Nagao, Kazuya Hiramatsu, Toshiyuki Hirai and Atsushi Nozu	505-510
Three-dimensional Numerical Analysis on Tsunami Waves around Containers on Apron and Tsunami-induced Wave Pressure and Tsunami Force Acting on Containers	Michio Higashijima, Ikuo Fujita, Koji Ichii, Susumu Iai, Takahiro Sugano and Michio Kitamura	511-516
	Tomoaki Nakamura, Kazutomo Shiraishi, Atsuhiko Usami, Norimi Mizutani, Shogo Miyajima and Takashi Tomita	517-522

Research on Realtime Tsunami Detection System Using Offshore Water Surface Elevation Data	Katsuyoshi Shimizu, Toshihiko Nagai, Jae Hyeng Lee, Hiroaki Izumi, Mineo Iwasaki and Takashi	523-528
Effect of Coastal Cross Section on Characteristics of Tsunami Deformations and Forces	Tomohiro Yasuda, Tomotsuka Takayama and Hiroki Yamamoto	529-534
Experiments on the Motions of a Vessel Moored in Tsunamis and on the Impact Forces on Ship Mooring Fenders	Muneo Tsuda, Yasunori Ooki, Tomotsuka Takayama, Hiroshi Higashino and Hidekazu Hayashi	535-540
Numerical Simulation of Tsunami Formation Due to Several Types of Seabed Deformation	Taro Kakinuma	541-546
Problem of Countermeasures Against Earthquake Tsunamis Disasters in Fishery Areas	Koji Otsuka, Toshiaki Ito, Noboru Tsubaki and Takashi Nakamura	547-552
Examination about a Disaster Scenario of Facilities Due to Tsunami – Examination Example about a Ship Evacuation–	Kei Kawamata, Kazuaki Takaoka, Hiroyuki Fujii and Shigeru Yamaki	553-558
Present Problems in Crisis Management of Bathing Beach for Tsunami Disaster	Tsutomu Komine, Takahiro Kazama, Kotaro Ohkuni, Toshinori Ishikawa, Takahiro Horiguchi and Masao Kawachi	559-564
Mitigation Effect Upon Tsunami Casualties Due to Coastal Defense Facilities	Takeshi Nishihata, Yoichi Moriya and Tamotsu Tamura	565-570
Characteristics of the Edge of Tsunami Acting on the Flap Type Gate	Osamu Kiyomiya, Ken-ichirou Simosako, Kyouichi Nakayasu, Yoshiaki Takagi, Hideo Kimura and Akiyoshi Okada	571-576
Experimental Study of the Flap Type Gate as a Tsunami Countermeasure	Shuji Shirai, Takashi Fujita, Yuichiro Kimura, Eiji Yamaguchi and Kyouichi Nakayasu	577-582
Development of a Flap Type Gate Reducing Transmission Waves into a Harbor	Syujii Shirai, Yuichiro Kimura, Takashi Fujita, Eiji Yamaguchi and Kyoichi Nakayasu	583-588
Understanding of Environmental Characteristics for Making Ideal Habitat in Estuary	Tadashi Hibino, Hideo Matsumoto, Masamitsu Mizuno, Shoji Fukuoka and Yoshifumi Yasumitsu	589-594
Study on Preservation of Biota to Anoxic Seawater Mass in the Constructed Tidal Flat	Kenshi Kimura, Kunio Kohata, Yasushi Ichimura, Takehiko Hiwatari, Ryouko Noriduki, Hiroshi Tanaka and Mitunori Mori	595-600
Flow Characteristics of Ulva Sp. in Yatsu Higata	Eiji Yauchi, Tomoki Hayami, Tatsuya Imoto and Michio Gomyo	601-606
Tidal Flats and Shallows Created through the Utilization of Dredged Sand and Its Effectiveness on Coastal Sea Environment and Its Problem	Takahiro Kazama, Kisaburo Nakata, Yoshio Tanabe, Masahiro Hasegawa, Iwao Oshima and	607-612
On Natural Environmental Characteristics in the Sone Tidal Flat	Yosinori Hara, Haruyuki Kojima, Masahumi Ezaki, Shuguang Yan, Keiji Simizu and Keiji Hisatomi	613-618
Temporal Variation of Kelp Yields Caused by Interannual Variation of Tsushima Current along the Southwest Coast of Hokkaido	Masabumi Seto, Tatsuaki Sato and Katsumi Yamashita	619-624
A New Technology of Seedling Production for Speedy Restoration of Eelgrass (Zostera marina) Bed	Yoshinori Koshikawa, Katsunori Yamaki, Bonn Keng Lim, Hanako Nakamura, Masahiro Tanaka and Hisao Ogawa	625-630
Field Experiment of Chlorophyll-a in Situ Quantification for Benthic Algae Using Portable Fluorometer	Toshiyuki Takao, Michio Kitano, Hidekazu Yamamoto, Hideo Oda and Tomonari Okada	631-636
Evaluation of the Improvement Effect Using Concrete Lump and Dredging Sand	Terumi Oohashi, Masao Morinaga, Hirohito Fukunaga, Hidekazu Yamamoto and Keiichi Tamura	637-642
A Field Experiment of Improving Water Quality by Micro Bubble Aeration System in Uranouchi Bay, Japan	Jun Yamamoto, Shinya Saeki, Yuhei Adachi and Hitoshi Tanaka	643-648
Under Construction Effects of Geomorphological Restoration of Subaqueous Borrow Pits and Extraction of Related Research & Development Tasks	Ryo-ji Naito, Toshiyuki Nakamura, Hitoshi Imamura and Masahiro Sato	649-654
The Experiment of the Seawall Provide Marine Organisms in the Actual Intertidal Zone in the Tokyo Bay	Shinsuke Hamatani, Hiroaki Hiyama, Kota Nakase, Juro Hiromi and Tomotada Okamura	655-660
Role of Tidepool on Terrace-type Tidal Flat as Benthos Habitat	Tomonari Okada and Keita	661-666
Design Procedures for a Caisson Wall Against Impulsive Wave Forces	Muneo Tsuda and Tomotsuka Takayama	667-672
Improvement of Calculation Accuracy of Wave Drift Forces Acting on a Marine Structure	Shotaro Kida and Tomoaki Utsunomiya	673-678
Development of a Strictly Combined BEM-VOF Method and Its Application to Wave Propagation through 3 Domains	Sangho Kim, Masaru Yamashiro, Akinori Yoshida, Nobuyuki Kurushima, Isao Uehara and Hiroshi Yamaguchi	679-684

Development of Two-dimensional Numerical Wave Flume with Translational and Rotational Motion of Structure Based on VOF Method	Koji Kawasaki	685-690
Analysis for Rising and Sinking Motion of a Flap-type Gate in a Still Water	Osamu Kiyomiya, Ken-ichirou Shimosako, Takamasa Yui, Seiya Yamashita, Masaki Shiina and Masayoshi Tsuchiya	691-696
A Study on International Evaluation for the North Breakwater of Otaru Harbour	Shin-ichiro Sekiguchi, Hideki Asada, Naoki Tomioka, Kenji Motoyama and Takanori Hayasi	697-702
A Study on the Stability of Caisson-type Breakwaters Covered with Wave-dissipating Blocks During Execution by Using the LCC Evaluation Technique	Takeshi Yoshioka and Takashi Nagao	703-708
Development of Slit Caissons for Offshore Breakwater	Akira Sakamoto, Shouetsu Ootomo, Syuuichi Nakanowatari, Nobuo Seki, Iwao Hasegawa and Tomohiro	709-714
Effect of Superstructures Shape on Hydraulic Characteristics in Sloping Top Caisson Breakwater Covered with Wave-dissipating Blocks	Shogo Miyajima, Masahiko Okajima, Takanori Morikawa and Sumio	715-720
Improvement of Gently Sloping Revetment to Enhance Coastal Use	Masanori Hasegawa, Akio Kobayashi, Takaaki Uda, Yasuhito Noshi, Yoshiyuki Hoshigami and Atsuto Sawamura	721-726
Study on the Application of the Reliability-based Design Method on Circular Arc Slip Failure Mode of Port Facilities Built on Improved Ground by the Sand Compaction Pile Method	Takashi Nagao, Mitsuo Nozu and Yuki Imai	727-732
Analysis on Pore Water Pressure Response of Foundation Soil Subjected to Ocean Wave Action	Hiroyuki Yamazaki, Kazuhiro Kaneda, Kenji Nagano and Kazunori	733-738
A Study on the Applicability of Pile and Plate Anchors Employed for Tout Mooring System and Their Design	Kinji Sekita, Yuuta Ohmura, Keisuke Usui and Yutaka Ohkawa	739-744
Management for Settlement in the Second Phase Construction Work of Kansai International Airport Project	Hiroshi Hirabayashi, Yoshiyuki Morikawa, Takechiho Tabata and Shinya Suzuki	745-750
Topography Change and Settlement of Breakwater Body Caused by Constructing Submerged Breakwater	Susumu Araki, Hirokazu Miyoshi, Tatsuro Igawa, Takayuki Tanaka and Ichiro Deguchi	751-756
Influence of Wave Induced Vortex Flows on the Stability of Armour Units about a Curtain Walled Dissipater	Mitsuteru Jinno, Takashi Onoduka and Takayuki Nakamura	757-762
Study on a Wave Force Acting on a Filter Unit on Sloping Breakwater and Its Stability	Hiroyuki Shimabukuro, Norimi Mizutani and Hirofumi Koyama	763-768
Consideration of Unburied Offshore Pipeline Stability Under Severe Storm	Tomiya Takatani	769-774
Study on Local Scour in Front of Impermeable Submerged Breakwater and Its Estimation Method	Kwang-Ho Lee and Norimi Mizutani	775-780
Examination on the Stability of Coastal Protection Facilities Focusing on Beach Topography Change	Yoshimichi Yamamoto and Nobuaki Iwasaki	781-786
Evaluation of the Amount Loads of the Nutrients from River to Ofunato Bai	Nobuko Kashiwadate, Obadha Odeny Fidel, Hironobu Sato, Munehiro Nomura and Masaki	787-792
Fundamental Study on Mass Transport Due to Flood around the Head of Tokyo Bay	Yusuke Nishida, Keisuke Nakayama and Tadaharu Ishikawa	793-798
In Situ Experiment of Erodability of the Estuarine Sediment	Koichi Yamamoto, Katsuhide Yokoyama, Susumu Tanaka and Yasukuni Kumada	799-804
Distribution of Bottom Sediments and Wave Base at Orido-Komagoe Nearshore Zone Off Miho Peninsula, Shizuoka Prefecture	Shuro Yoshikawa, Kenji Nemoto and Kenshi Kimura	805-810
Numerical Simulation of Coastal Currents in Ise Bay at Large Floods and Analysis of Flow Structures	Tomokazu Murakami, Koji Kawasaki, Masato Yamaguchi and Norimi Mizutani	811-816
Deep Water Intrusion Over a Sill and Its Influence on Dissolved Oxygen Concentration	Keisuke Nakayama and Tomonari Okada	817-822
A Simulation of Oxygen-deficient Water Mass in Ise-Mikawa Bay Affected by Meteorological Disturbances	Akiyuki Ukai, Tomokazu Murakami and Takashi Yasuda	823-828
Numerical Simulation on Flow Field Considering Seasonal Characteristics in Tokyo Bay	Manabu Igarashi and Keisuke Nakayama	829-834
A Study of the Potential and Its Recovery of the Current Energy in the Surrounding Sea of Japan	Tadashi Torii, Hiroshi Ookubo, Makoto Yamane, Kinji Sekita and Kazuichi Seki	835-840
Development of Straight Wing Vertical Axis Hydro Turbine Generation System	Tadashi Torii, Makoto Yamane, Hiroshi Ookubo, Kazuichi Seki, Kinji Sekita and Keita Sagara	841-844
Characteristics and Appearance Conditions of Fluid Resonance in Narrow Gaps of Very Large Floating Structure Composed of Rectangular Modules	Takehisa Saitoh, Hideki Iwata, Yoshiyuki Takahashi, Guoping Miao and Hajime Ishida	845-850
Dynamics and Performance of a Water-chamber Type Floating Breakwater	Takayuki Nakamura and Naonori Takemura	851-856

Mooring Analysis of Immersed Tunnel Element Considering the Slack of Mooring Lines	Yasutoshi Yoshimoto, Takami Hanada, Toru Ishibashi, Koichirou Anno, Yoichi Moriya and Syoji	857-862
An Experimental Study of Floating Wind Power System	Kiyokazu Yago, Yutaka Ohkawa, Motohiro Hineno, Osamu Takano and Shunji Sunahara	863-868
Development of the Offshore Wind and Power-generation Rate Estimation System Based on Field Data	Toshihiko Nagai, Satoru Shiraishi, Katsuyoshi Shimizu, Eiji Naruse, Kazuhiro Yagi and Takayuki Otsu	869-874
Structural Properties and Model Tests on Wind Loads and Turbulance Induced by a Truss Tower Supporting a Large Scale Offshore Wind Turbine	Kinji Sekita, Yuuta Ohmura, Kiyokazu Yago, Atsushi Yamashita and Shogo Miyajima	875-880
Experimental Fatigue Analysis of Offshore Wind Power Generation Facility	Eiji Naruse, Kinji Sekita, Kazuhiko Nishi, Shunzo Oka, Motohisa Hara and Shigeo Yokoyama	881-886
Field Experiment on Stabilization of Sandy Beach Using Coarse Materials at Jinkoji Coast in Ibaraki Prefecture	Hideo Ishii, Tomokazu Nakamura, Takaaki Uda, Yasuhiro Ohki, Takayuki Kumada and Masumi	887-892
Study in Change of Wave Height and Change of Shorelines	Hiroyuki Mori and Masato Minami	893-898
Simple Model for Predicting Topography of Sand Bar of River Mouth	Kou Furuie, Takaaki Uda, Masumi Serizawa, Toshiro San-nami, Yuki Yoshi Hoshigami and Isao Takahashi	899-904
Control of Transformation in an Artificial Semi-enclosed Beach	Hideo Oshikawa, Shinichiro Hari, Yasushi Iseri, Takahiro Horita and Toshimitsu Komatsu	905-910
Photographic Survey in a Sub-aquatic Region Applying Commercially Available Digital Camera	Ryoji Tanaka, Ryuichiro Nishi, Tetsuya Yuki and Satoru Futatsumachi	911-916
Prediction of Intervals of Rip Currents	Makoto Shibasaki, Takaaki Uda and Masumi Serizawa	917-920
Numerical Simulation of Transient Current	Satoshi Nakamura	921-926
Fundamental Study on Inlet Geomorphology -An Approach for a Global A-P Relationship-	Ryuichiro Nishi, Nicholas C.Kraus and Akira Kawamori	927-932
Report on Drowning Accident at Pansea Beach on Phuket Island	Takaaki Uda, Toshiro San-nami, Toshinori Ishikawa, Toshiro Onishi, Masumi Serizawa and Kou Furuie	933-938
Study on Construction Technology for Environmental Improvement at Riverbed Covered by Organic Sediment	Tadashi Hibino, Mitsuhiro Suekuni, Kyohei Yamada, Kazufumi Tada, Satoshi Tomida and Masamitsu Mizuno	939-944
Development of a High Efficiency Dehydration Method of Dredging Sludge for Use of Tidal Flat Construction	Norio Katakura, Seizou Ueno, Mineo Kobayashi, Takahiro Shibata, Daizo Imai and Kazuo Murakami	945-950
Development of Manufacturing Technique for High Quality Stabilized Dredging Soil Using a Compressed-airmixture Pipeline with a Drumstyle Mixer	Hideki Iwata, Yuji Okumura, Masaru Kawauchi, Yoshinori Satou, Takehisa Saitoh and Hajime Ishida	951-956
Hydraulic Physical Model Test for the Tunnel Immersion of Railway Bosphorus Tube Crossing	Yukinobu Oda, Kazunori Ito, Seizo Ueno, Fumio Koyama, Masatoshi Kimura and Hideki Sakaeda	957-962
An Accounting Method for Construction of Water-route in Inner Harbor Enclosed Coastal Sea	Mamoru Arita, Ichiro Deguchi, Shoichi Mori and Tsuyoshi	963-968
Development of Onboard Vacuum Suction Oil Recovery System - Performance Test in Large Scale Test Tank	Isamu Fujita, Muneo Yoshie, Iwao Noda, Shigekatsu Hosotani and Kazunori Tatewaki	969-974
Experiments of the Bucket Style Oil Skimmer with a Drainage Pump Operated in the Large Wave Basin	Muneo Yoshie and Isamu Fujita	975-980
Study on Method of Water Quality Improvement at Semi-closed Water Area of Cold Region	Shunsuke Makita and Hiroshi Saeki	981-986
