Contents

Preface
Notes to Users
Subcommittee on the STANDARD SPECIFICATIONS FOR TUNNELING-2016 Working Group for Mountain Tunnels

1. OUTLINE
   1 Rules
      1.1 Scope
      1.2 Definitions
      1.3 Relative Laws and Regulations
      1.4 Selection of Mountain Tunneling Method and Examination Procedure
      1.5 Consideration of Maintenance and Management

2. PLANNING AND INVESTIGATION
   1 General
      1.1 Fundamentals of Planning
      1.2 Fundamentals of Investigation
   2 Planning
      2.1 Planning of tunnels
         2.1.1 Horizontal Alignment of Tunnels
         2.1.2 Vertical Alignment of Tunnels
         2.1.3 Inner Cross Section of Tunnels
         2.1.4 Auxiliary Tunnel Facilities
      2.2 Construction Planning
         2.2.1 Establishment of Construction Sections
         2.2.2 Construction Methods and Schedule Planning
         2.2.3 Working Drifts
         2.2.4 Construction Roads, Outside Equipment and Muck Disposal Areas
      2.3 Environment Preservation Measures
   3 Investigation
      3.1 Investigation of Ground Conditions
         3.1.1 General of Investigation of Ground Conditions
         3.1.2 Investigation of Topography and Geology for Route Selection
         3.1.3 Research of Geology for Design and Construction Plan
      3.1.3 Research of Geology for Design and Construction Plan
      3.1.5 Hydrological Research
      3.2 Investigation of Location Conditions
         3.2.1 General
         3.2.2 Environmental Investigation
         3.2.3 Research of Laws and Regulations which Regulate the Project
         3.2.4 Research of Requirements for Compensation
4 DESIGN OF LINING

4.1 General

4.1.1 General ................................................................. 96
4.1.2 Philosophy for lining design ...................................... 97

4.2 Fundamentals of Design

4.2.1 Shape of Lining ...................................................... 98
4.2.2 Design Thickness of Lining ....................................... 99
4.2.3 Mix and Strength of Lining Concrete ......................... 99
4.2.4 Countermeasure against Cracks in Lining Concrete ........ 100

5 DESIGN OF INVERTS

5.1 General ................................................................. 102
5.2 Shape and Thickness of Inverts .................................... 103
5.3 Strength and Mix of Invert Concrete ............................ 106
5.4 Early Closure of Invert ............................................ 106

6 Design of Waterproofing and Drainage Systems

6.1 General ................................................................. 110
6.2 Waterproofing ......................................................... 111
6.3 Drainage ............................................................... 111

7 Design of Portal Zones and Portals

7.1 General ................................................................. 114
7.2 Portal Zones .......................................................... 116
7.3 Portals ................................................................. 118

8 Design for Special Conditions

8.1 General ................................................................. 122
8.2 Special Grounds ....................................................... 123
8.3 Special locations ....................................................... 125
8.4 Neighboring Construction

8.4.1 General ............................................................. 126
8.4.2 Tunnels in the Vicinity of Existing Structures ............... 127
8.4.3 Neighboring Tunnels in Proximity to Each Other .......... 131
8.4.4 Tunnels Affected by Neighboring Construction ............. 136

8.5 Special Shapes and Dimensions

8.5.1 General ............................................................. 139
8.5.2 Bifurcation Points, Enlargements and Especially Large
Cross Section .............................................................. 139

8.6 External Loads After Completion

8.6.1 General ............................................................. 143
8.6.2 Earth Pressure ...................................................... 144
8.6.3 Water Pressure .................................................... 145
8.6.4 Earthquake ......................................................... 145
8.6.5 Other External Loads ............................................ 146

4. CONSTRUCTION

1 General Provision

1.1 General ............................................................. 147
1.2 Investigation and Monitoring during Construction .......... 147
1.3 Changes in Construction Methods .............................. 147
2 Surveys
  2.1 General
  2.2 Control Points Outside Tunnel
  2.3 Tunnel Surveys
3 Temporary Facilities Scheduling
  3.1 General
  3.2 Temporary Facilities Inside and Outside Tunnel
  3.3 Power Equipment
4 Excavation
  4.1 General
    4.1.1 Excavation Plan
    4.1.2 Measures for Face Stabilization
    4.1.3 Overbreak
    4.1.4 Drainage
  4.2 Blasting
    4.2.1 General
    4.2.2 Blasting Work
  4.3 Mechanical Excavation
    4.3.1 General
    4.3.2 Excavation
5 Mucking
  5.1 Mucking Plan
  5.2 Mucking Machines
  5.3 Muck Loading
6 Transportation inside the Tunnel
  6.1 Hauling Method
  6.2 Road Surfaces and Railroad Tracks
  6.3 Hauling Vehicles
  6.4 Traffic Control
7 Supports
  7.1 General
    7.1.1 Basic Supports Plan
    7.1.2 Reinforcement and Replacement of Supports
  7.2 Shotcrete
    7.2.1 Selection of Shotcrete
    7.2.2 Shotcreting Machines
    7.2.3 Field Mixing of Shotcrete
    7.2.4 Shotcreting
  7.3 Rock Bolts
    7.3.1 Equipment
    7.3.2 Drilling and Cleaning of Holes for Rock Bolts
    7.3.3 Setting and Grouting of Rock Bolts
  7.4 Steel Supports
    7.4.1 Equipment
    7.4.2 Erecting Steel Supports
8 Lining
  8.1 Forms
    8.1.1 General

5 Tunnels in Squeezing Ground
  5.1 Tunnels in Squeezing Ground .................................................. 244
6 Tunnels in the Ground with Danger of Rock Burst
  6.1 Tunnels in the Ground with Danger of Rock Burst ...................... 248
7 Tunnels in Ground with High Levels of Geothermal Heat, Hot Springs, or Toxic Gases
  7.1 Tunnels in Ground with High Levels of Geothermal Heat,
       Hot Springs, or Toxic Gases ............................................... 250
8 Tunnels in Ground with a Danger of High Water Pressure or Large Inflow Volumes
  8.1 Tunnels in Ground with a Danger of High Water Pressure or
       Large Inflow Volumes ...................................................... 252

8 Urban Mountain Tunneling Methods
  1 General ....................................................................................... 253
  2 Planning and Surveys .................................................................. 254
  2.2 Investigation ............................................................................ 257
  3 Design ....................................................................................... 260
  3.4 Lining and Invert ..................................................................... 264
  4 Construction .............................................................................. 271
  4.2 Lining and invert ...................................................................... 271
  4.4 Shaft ....................................................................................... 272
  5 Observation and Measurement ................................................... 273
